

Care and Maintenance for Bathtub, Sink, or Tile

Congratulations! You have selected the most durable refinishing system available in the country.

HSLD-5000 has been used in over 4 million successful applications nationwide, and by following the guidelines below, you will be assured of many years of trouble-free service.

1. **Please do not use this surface for 24 hours** (at room temperature). Although the refinished surface can be put back into full use after this time, the surface will actually require up to 90 days to completely cure.
2. If you use a bathmat, it must **NOT** have suction cups. Use of a suction cup mat will increase the chance of damage to the surface whenever it is removed. **Use of this type of mat will void your warranty.** New Look Refinishing can apply a non-slip surface to the bottom of the bathtub which will negate the need for a bathmat. (Additional charge may apply.)
3. The surface should be cleaned regularly. Any cleaning product that is safe for acrylic surfaces, such as Formula 409, Fantastik, or Scrubbing Bubbles, used once a week, will keep the surface in like-new condition for years to come. Daily shower sprays should **NOT** be used.
4. **Do NOT** use any abrasive cleaners or scrubbing pads on your new finish. Abrasives will scratch the surface.
5. **Please note:** All newly refinished surfaces will have some surface dust which will have settled into the new surface. **Do not be alarmed.** Because the surface is still within its long term cure period, normal use and regular cleaning will remove all minor surface dust marks.
6. **Do NOT** leave shampoo bottles, soaps, or soap containers on the surface. The chemicals in some products can cause the surface to discolor within a short time. Use of a shower caddy™ or shelving system is recommended.
7. **Do NOT** drop sharp or heavy objects onto the surface, which may cause it to chip. Contact New Look Refinishing for repairs if this should occur. **Failure to do so within 14 days of damage will void your warranty.**
8. Damage to the surface may occur through the improper use of acid bearing compounds, such as drain openers or grout cleaners. All harmful chemicals must be kept away from the refinished surface. These chemicals include, but are not limited to: cosmetics, hair dyes, and perfumes, which may stain or otherwise mar the surface.

Remember, If you treat your new surface with respect, clean it regularly, and follow the above guidelines, your fixture will remain shiny and bright and give you years of trouble free service.

*New Look Refinishing, Co. guarantees our service for 2 full years against defective materials and the quality of our workmanship. However we cannot control the care and maintenance of the surface. Abuse and/or improper cleaning habits could damage the surface and will require an additional charge to repair, at the discretion of New Look Refinishing.
